

OUR COMPANY

LiquiTech is the world's premiere provider of non-chemical, environmentally friendly methods for controlling waterborne pathogens, boasting over 19 years of documented efficacy and over 1,200 installations in some of the most prestigious institutions across the globe.

Our systems significantly reduce costs for healthcare providers, improve quality of patient care and ensure a safer environment by eliminating the threat of pathogens in water such as Legionella, Listeria, Salmonella, E.Coli, Pseudomonas, M. Avium and Staphylococcus. This translates into a better experience for patients and a superior image for your facility.

OUR CHAIRMAN & CEO: STEVE SCHIRA

For more than 25 years Steve has been on the cutting edge of providing sustainable technologies which demand higher environmental standards for public health and patient safety, resulting in a reduction of clinical, utility, and energy costs. Steve is also the Managing Director of Terra Marra International, on the Advisory Board of Hatlenboer Water Treatment International, and an active member of ASPE, ASHE, APIC, ASHRM, and the American College of Health Care Executives.

OUR TEAM
